

Mental Health AI Agent - Project Complete

Core Features Implemented

- **Promote Awareness & Education:** Resources, breathing exercises, RAG-integrated content.
- **Enable Early Detection (RAG):** Distress signal detection, multi-level risk classification.
- **Provide Empathetic Support:** GPT-4 powered empathy, conversation management, safety disclaimers.
- **Predict & Prevent Risks:** Stress peak forecasting, mood trend analysis, alert systems.
- **Connect to Human Support:** Crisis helpline integration, 24/7 resources, emergency response.

Project Structure

```
mental-health/  
├── backend/ (FastAPI, Services, Routers, Models)  
├── frontend/ (React, Components, Pages)  
├── docs/ (Documentation)  
└── README.md
```

Safety & Compliance

- **Medical Disclaimer:** Clear statement provided.
- **User Consent:** GDPR compliant design.
- **Crisis Response:** Immediate helpline display for high-risk scenarios.

Technology Stack

Backend: FastAPI, LangChain, OpenAI GPT-4, ChromaDB, Pydantic

Frontend: React 18, Material-UI, Axios

AI/ML: OpenAI Embeddings, GPT-4 Turbo, RAG, Risk Prediction

Key Capabilities

- Real-time Risk Assessment
- Empathetic Conversations
- Mood Tracking & Stress Prediction
- Resource Library & Crisis Detection
